

RENAULT TEAM 3

Sahra Lallali
Aaryan Chaturvedi
Christopher Cahour

Gabriel Bernière
Akash Kumar Gautam

Our Persona

Target Audience

Age: 25–45 years
Car Drivers

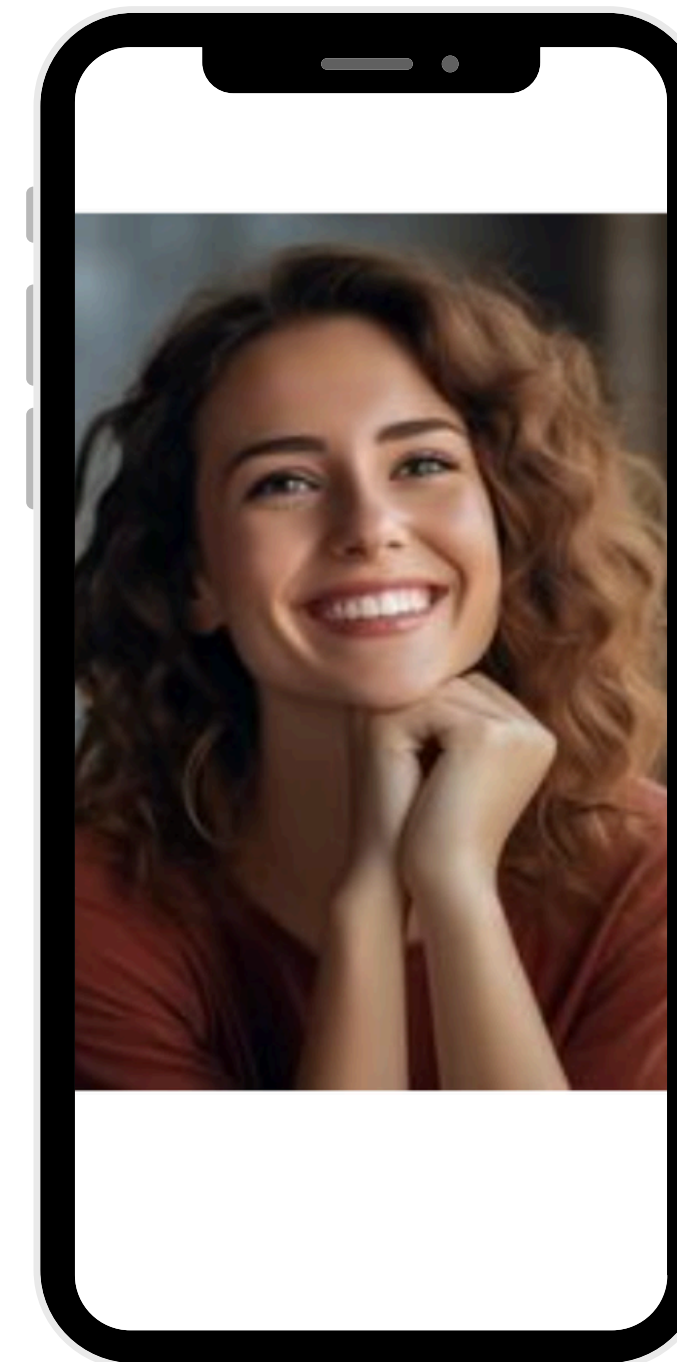

Fear of Fines & Accidents

Need to check their location but worried about being in a dangerous situation or being fined

Dependent on smartphone

Their vehicles lack modern infotainment systems, making them dependent on their smartphones while driving

The Difficulties

Distracted Driving Due to Smartphone Use

- Increasing number of fatalities due to distracted driving.
- Looking away for 2 seconds doubles the risk of accident.
- Phone usage while driving is increasing especially to change music.
- A 2021 study shows that 58% of drivers struggle with last-minute navigation adjustment causing abrupt braking and wrong turns.

1 – What is Glyde ?

Untitled

Edited 2 years ago

SCAN THIS

Let's dig deeper : The display on the windshield

How it works

- Place platform with mirror behind the steering wheel
- Place the phone on the base
- It will project the screen on the visor

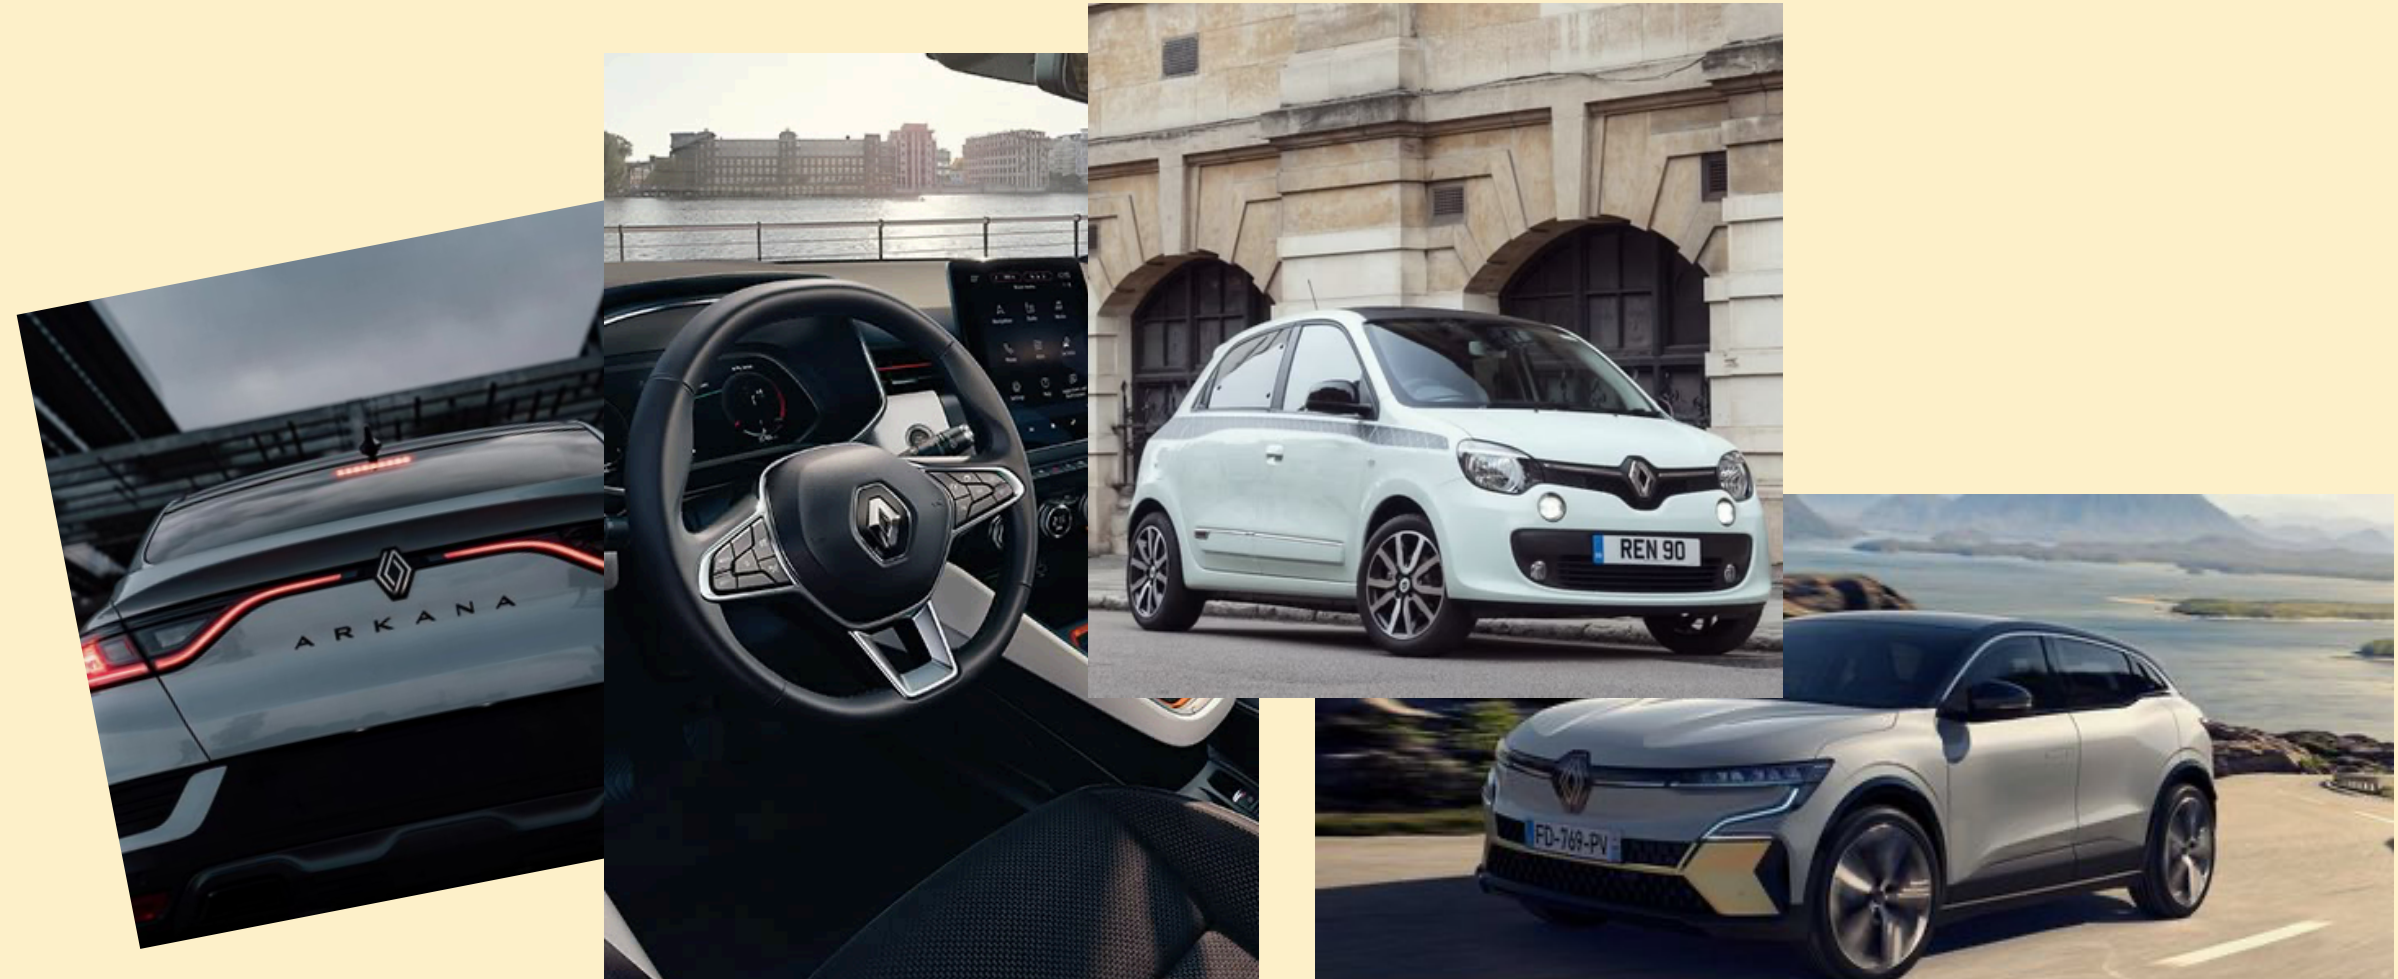

2 – Glyde, a revolution in the car industry.

A- Why Glyde

B- Market Analysis

C- Business Model

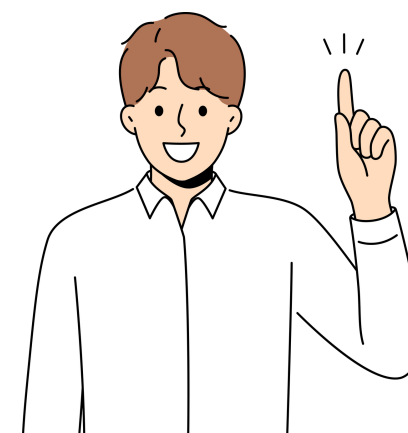

D- Implementation Channels

Why Glyde

Glyde App

- One screen with all the features a driver needs
- Hand Free navigation through the app with the voice assistance

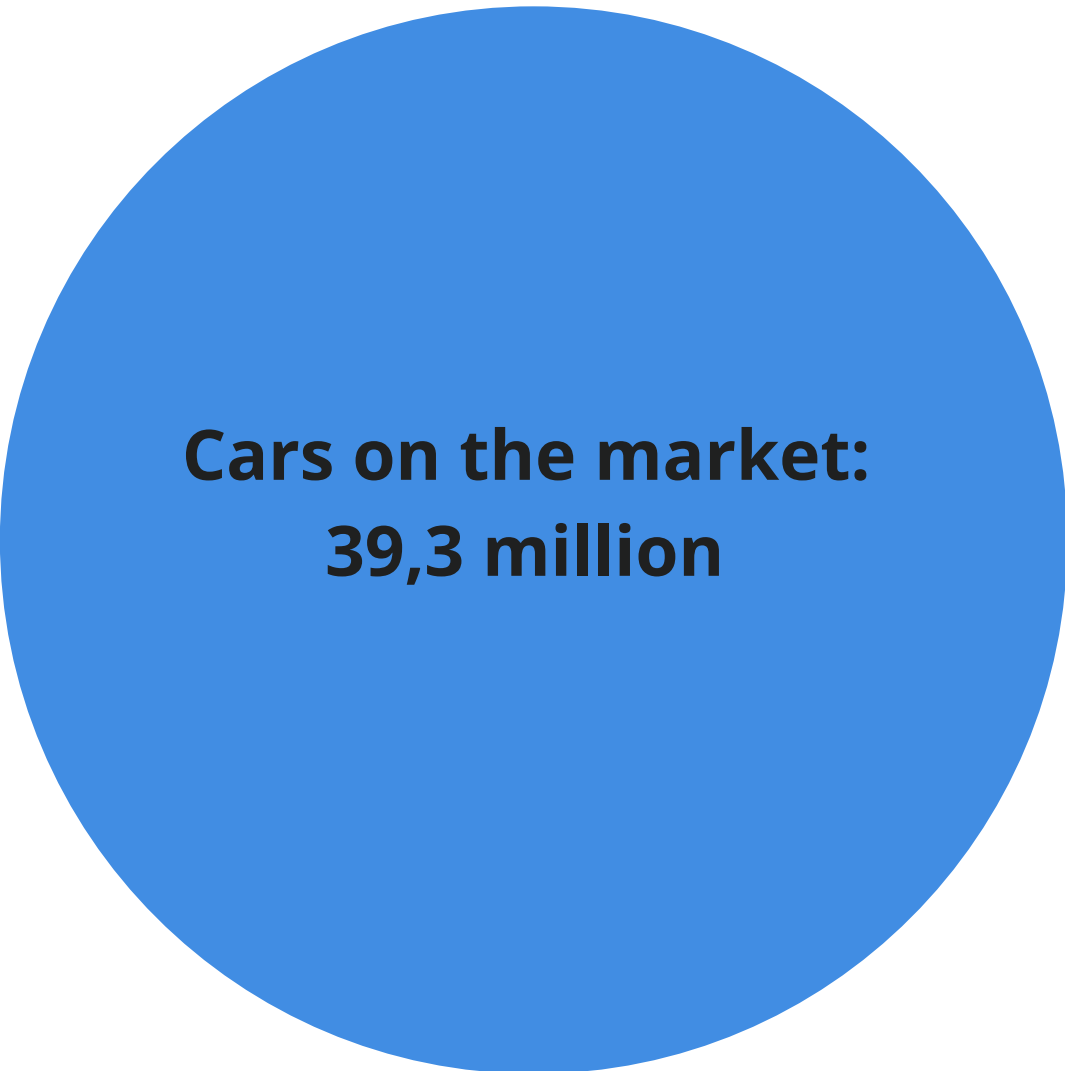

Windshield Projection

- Navigating through the app without taking off eyes from the road
- Putting the phone out of reach for the driver

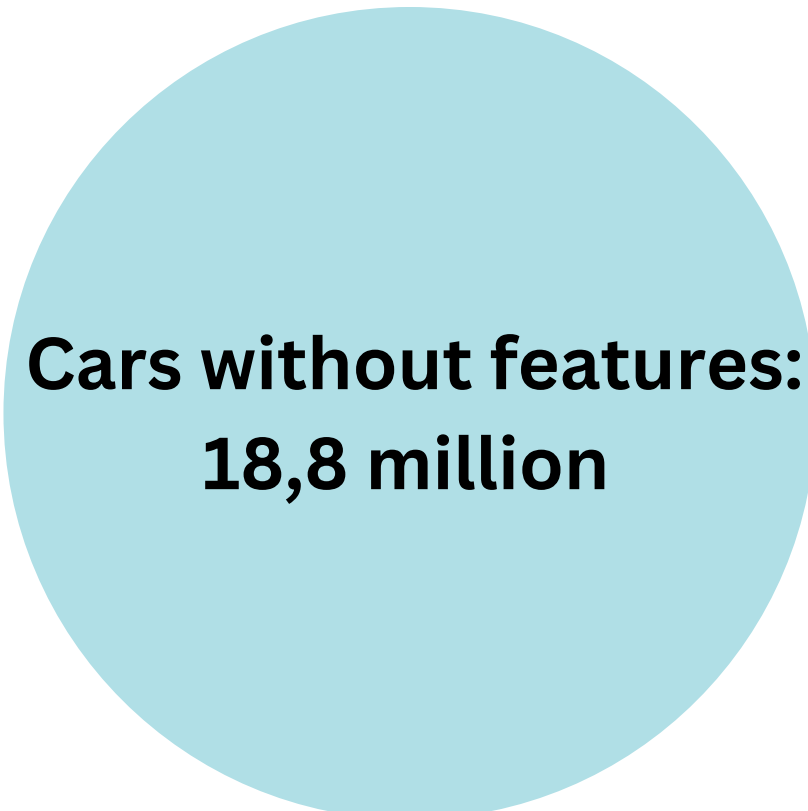

2 - Market analysis

- Cars on the market was estimated at 39,3 million (January 2024)
- We calculated 18,8 million cars from 2014 or older (without a car play)

**Cars on the market:
39,3 million**

**Cars without features:
18,8 million**

How to implement it

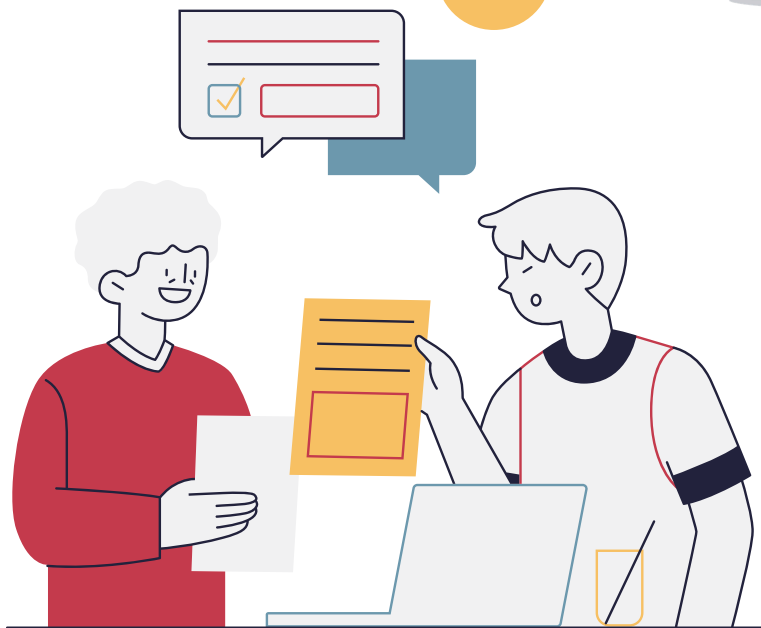

01

Digital Acquisition : Email directly into Renault's database and promote on social media as our persona is still young

02

B2B Partnerships : Insurance company - MAIF

Thank You
