

Self-care goes beyond skin deep—it's about **looking and feeling your best**. We aim to synchronize care for Mental well being, skin and hair as they all are **interconnected** with each other. But for men, juggling all three? That's where the real challenge begins.

With our **L'Oréal MEN+ Ecosystem**. This AI-powered platform automates daily grooming into a personalized, holistic self-care experience with a simple voice command: **Hey Loréal, Start my routine!**

The brain of our innovative ecosystem is the **L'Oréal MEN+ App**. Using advanced AI, the app scans and analyzes stress and skin while taking scalp health data from smart brush.

It **actively communicates** with both Smart Hairbrush and Smart Pod, sending precise commands to dispense the right products at the right time.

L'ORÉAL MEN+ ECOSYSTEM

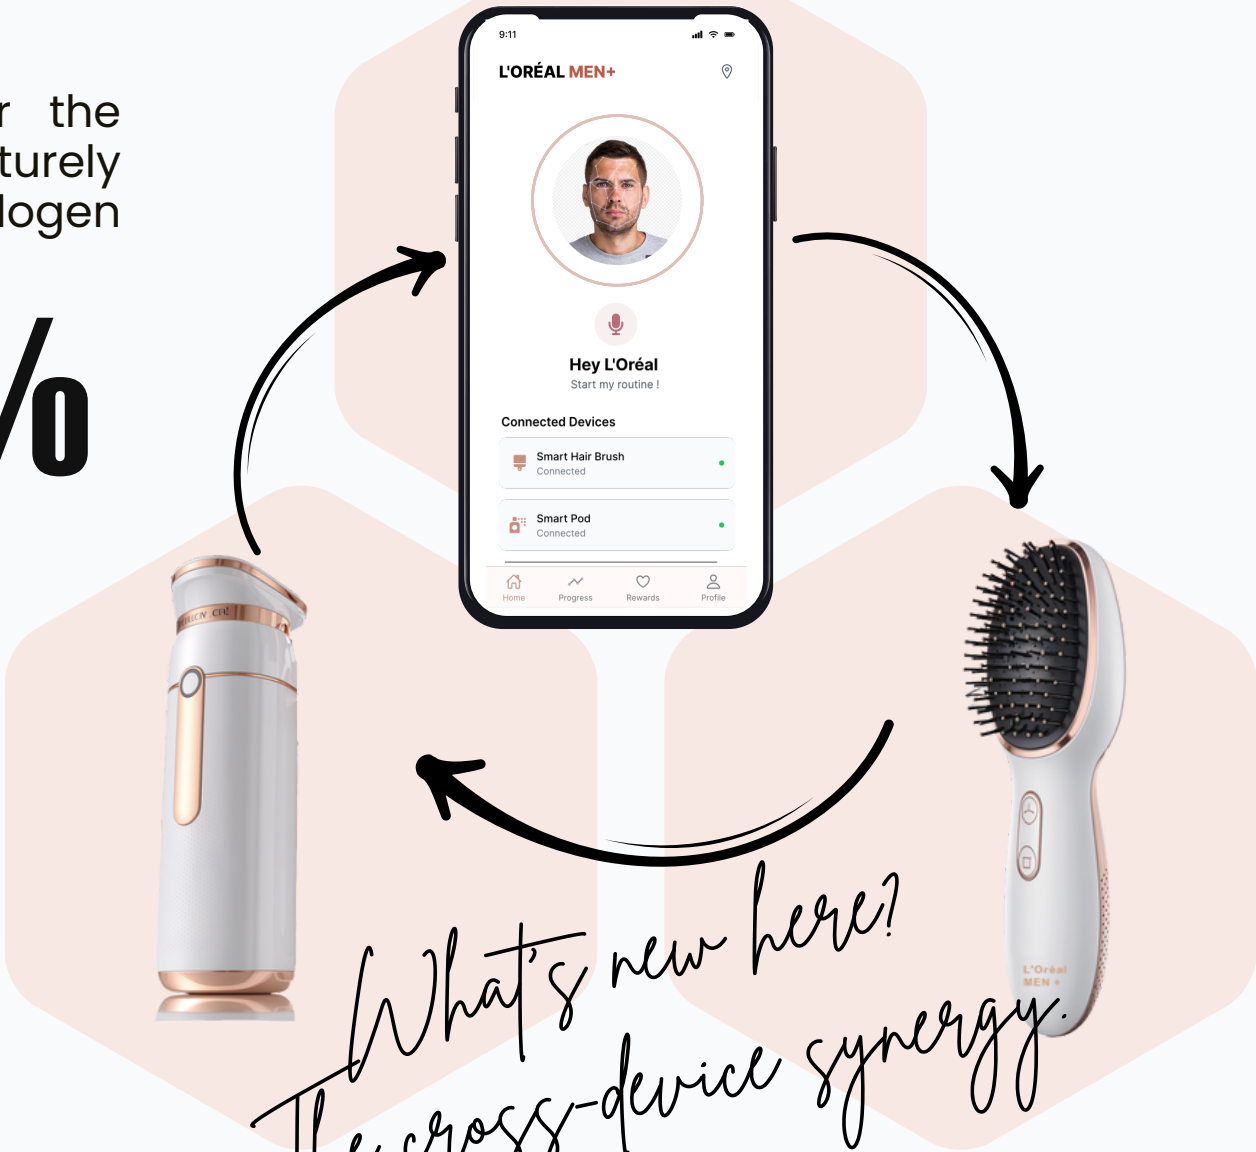

Each time a user completes a routine, the AI collects more data, learns the patterns, and provides even more precise recommendations.

Eliminates the hassle of choosing products and deciding routines. It takes care of all the complexities

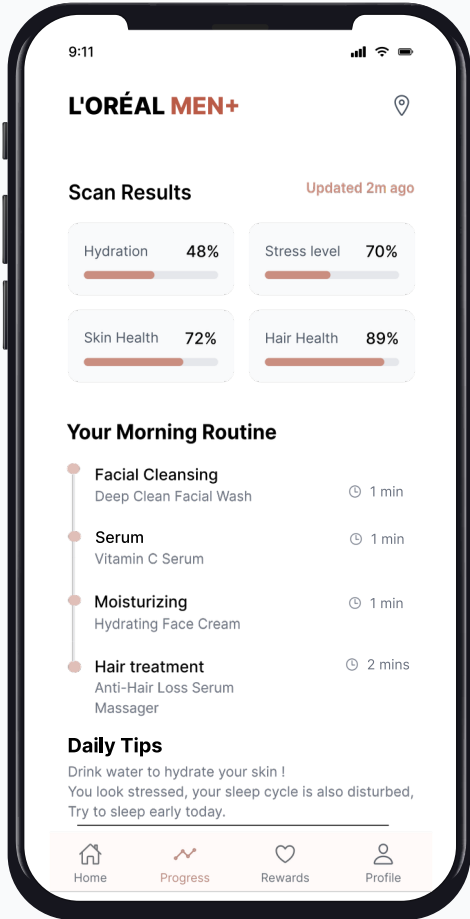

Grooming redefined: effective, automated, and personalised to modern men's needs.

70% Hair follicles can enter the "resting phase" prematurely due to stress-induced telogen effluvium

Acne patients have dandruff, suggesting a notable correlation between the two conditions. **85%**

“HEY L'ORÉAL, START MY ROUTINE”

ALL IN ONE

L'Oréal Men + Smart POD

Auto-Dispenses
the right amount
of product

4 cartridges in
the POD

One button to start the
process

IF STRESS IS DETECTED, THE SYSTEM MAY
INCREASE HYDRATION LEVELS OR
RECOMMEND ANTI-REDNESS PRODUCTS.

Adapts
DAILY

Sustainability is the key Strength

- Refillable Cartridge system, minimizing packaging waste
- Energy-efficient device with a long battery life reduces environmental impact
- Smart Pod reduces product waste by distributing exactly the amount of product needed

Inclusivity

- Designed for all skin and hair types, the cartridge system makes it easier to expand options without producing full-sized bottles, ensuring large product variety
- AI enables adaptation to personalized routines for different ethnicities, skin tones & grooming needs
- Stigmas around male self-care are broken but does not exclude female self-care

Scalable Worldwide

- Regionally adaptable with AI-driven recommendations and a cloud-based ecosystem.
- Men's grooming industry is expected to reach 115 billion dollars by 2030
- AI-driven solutions are highly scalable with the smart personal care device market currently growing at a CAGR of 15,7%
- L'Oréal's global presence enables rapid expansion

Scalable System: In long term we aim to integrate full body wellness and introduce more tools in the ecosystem such as smart mirror or wearable gadgets

THE POWER OF OUR IDEA *

What makes it unique ?

- First-ever grooming ecosystem that integrates mental health
- AI-driven, completely personalised self-care that integrates real-time health data
- Automates the skincare. Voice-activated, devices automatically dispense the product
- Data-driven habit formation for better results using gamification approaches, reward system as well as AI coaching

Selfcare one voice away

Feasability

Technological Viability

Our smart devices leverage existing sensor and dispensing technologies with enhanced features, reducing R&D risks and upfront investment. App development is complex, involving AI, stress scanning, and device synergy, but remains feasible and achievable.

Revenue Model & Monetization

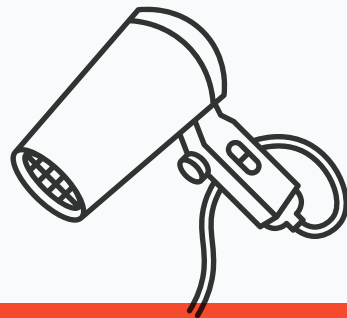

The device financial model to focus on cartridge sale driven revenue - with reasonable upfront product cost to promote product penetration followed by repeat business via cartridges

The app to be made available free of cost to users. The data generated by the app will help to inform future marketing efforts and R&D

Market Readiness & Consumer Adoption

Addresses real pain points in men's self-care, easy to use as it is voice automated

Approximate Selling Price & Market Postitioning

Pricing Strategy

- Smart Hairbrush: 99 € to 129 €
- Smart Skincare Pod: 149 € to 199 €
- Refills: 15ml cartridges 7€
- Bundled Starter Kit: 259 € to 299 €

Positioning:

- Consumer Products Division
- Luxury Tech-Driven Grooming
- Main competitors: Estée Lauder, Foreo

KPI's

- Number of App-Installs
- Active users on App
- Average Product usage time
- Average monthly Refill Rate
- User satisfaction
- Awareness of the product

Essential Oil Infusion

Premium Design
